

RQ1

What are the current SYE approaches used by SCS developers?

Investigate the current SYE approaches used by SCS developers and gather data about the environment and typical SCS missions

Objective 1

RQ2

What are the shortcomings of SYE approaches used by SCS developers?

Identify quantifiable parameters that can describe shortcomings in current SYE approaches

Objective 2

RQ3

Can a new, tailored SYE methodology address a selection of the shortcomings identified in RQ2 for SCS?

Synthesise a set of methods for technical management and system realisation that describe a complete SYE methodology for SCS

Objective 3

RQ4

Is the SYE methodology developed in RQ3 effective in practical scenarios?

Validate the new methodology on at least one space mission that will succeed in environmental qualification

Objective 4
