

*** Test Cases ***

Parameter: Temperature

```
Send TC      parameter_get      { 'parameter': 'internal_temperature' }
TM Type Should Be      parameter_value
TM Arguments Should Contain      parameter      internal_temperature
${temperature} =      Get TM Argument      value
Should Be True      10 < ${temperature} < 60
```

Parameter: Boot Count

```
Send TC      parameter_get      { 'parameter': 'boot_count' }
TM Type Should Be      parameter_value
TM Arguments Should Contain      parameter      boot_count
${boot} =      Get TM Argument      value
Should Be True      ${boot} > 0
```

Parameter: Health

```
Send TC      parameter_get      { 'parameter': 'health' }
TM Type Should Be      parameter_health
${tm} =      Get Full Response
Should Be True      0 <= ${tm['cpu']} <= 100
Should Be True      20 <= ${tm['memory']} <= 90
Should Be True      0 <= ${tm['flash']} <= 100
Should Be True      ${tm['uptime']} > 0
```

Ping without content

```
Send TC      ping      { 'content': b'' }
Command Should Be Successful
```

Ping with content

```
Send TC      ping      { 'content': b'hi!' }
TM Type Should Be      ping_reply
TM Arguments Should Contain      content      hi!
```
